Agenda Item No. 1 : Beach Party

Discussion Summary

On the meeting with the Dean of PSPS, he gave some of his messages regarding Student Council's plan to hold a beach party activity. The messages are as follows:

1. All activities that are proposed by Student Council are basically self-funded. However, office can give financial support under certain conditions such as the activities are important and having educational content or supporting the PSPS programs.
2. Once proposal is submitted to the office, the faculty member will hold a meeting to decide whether financial support can be granted based on three criterias:
 - The activity should be valuable and meaningful or having educational content as well as improving the performance of PSPS programs.
 - How high is students' participation rate
 - How much students' contribution in paying student council fee.
3. Based on that steps, office has decided to decline the proposal of beach activity based on three reasons:
 - The faculty members consider this activity is less meaningful and desirable because it has no educational content and just simply going to the beach and enjoy summer.
 - Student contribution in paying student council fee is too low while the need to fund the accommodation is expensive.
 - This kind of activity will be difficult to manage and control by Student Council. The beach is an open space. There will be risks of students' missing or in conflict with drunken Koreans or other Foreigners.
